University: Addis Ababa Science and Technology University (AASTU)

PROFILE SUMMARY

Dedicated 5th-year Computer Engineering senior student at Addis Ababa Science and Technology University (AASTU) with a strong technical foundation in software engineering, full-stack web development, and Arduino embedded hardware systems. Experienced in building practical web applications and microcontroller hardware-software solutions. Committed to continuous learning, multidisciplinary teamwork, and delivering reliable engineering solutions.

EDUCATION

Bachelor of Science in Computer Engineering (5th Year Senior) — 09/2022 – 07/2027

Addis Ababa Science and Technology University (AASTU) — Addis Ababa, Ethiopia

Relevant Focus: Software Engineering, Web Technologies (HTML5, CSS3, JS), Arduino Programming, Microcontrollers (AVR/PIC), Embedded C/C++, Database Systems, Data Structures & Algorithms.

TECHNICAL SKILLS

- **Frontend Web:** HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, Flexbox/Grid
- **Backend & Languages:** Python, C / C++, Node.js, RESTful APIs, PostgreSQL
- **Arduino & Embedded Systems:** Arduino Programming, Microcontrollers (AVR/PIC), Circuit Design, Proteus Simulation, IoT Sensors, Embedded C/C++
- **Developer Tools:** Git, GitHub, VS Code, Linux Environment
- **Professional Strengths:** Problem Solving, Teamwork & Collaboration, Continuous Learning, English Proficiency

VERIFIED CERTIFICATIONS & ACADEMIES

- **Engineering Agentic Artificial Intelligence Solutions** | *The Udara Project & NSK AI* (Issued July 13, 2026)
Verified by Ifeanyi Okala (Founder) | Certificate ID: cmriv64ws08331417au085co0
- **M-Academy Training: Gig-101, Business, Legal and Finance** | *Mesirat & Mastercard Foundation* (Issued March 23, 2025)
Verified by Menna Tafesse (Program Director) | In Partnership with Gebeya & Shega
- **English Professional Language Certification** | *Sest American English Academy*

FEATURED ENGINEERING PROJECTS

- **AASTU Academic Management Portal:** Centralized web application for student course management, grade tracking, and campus notices built with JavaScript, Python, and PostgreSQL.
- **Arduino Smart Environmental Monitor:** Microcontroller-based IoT system using Arduino UNO, C++, gas/temperature sensors, and Proteus simulation for real-time alerts.
- **Arduino Home Automation System:** Hardware relay control system designed with embedded C firmware, optocouplers, and Proteus circuit simulation.
- **Modern E-Commerce Storefront:** Scalable web application featuring catalog search, shopping cart state management, and user authentication.
